

DATA BRIEF:

DISTRICT CAREER DUAL ENROLLMENT

DEFINITION OF CAREER DUAL ENROLLMENT

Florida Statutes define dual enrollment as one of several articulated acceleration mechanisms (early admission, advanced placement, credit by examination, International Baccalaureate, and other postsecondary early entrance opportunities) where students enroll in postsecondary instruction and receive both postsecondary and secondary credit. ¹ The intent is to broaden curricular options, increase depth of study options available to students, and shorten the time necessary for completing the requirements for earning a high school diploma and a postsecondary certificate or degree.

Through dual enrollment public and home education secondary students may enroll in postsecondary courses creditable toward both high school graduation and a career certificate or an associate or baccalaureate degree. There are two curricular avenues for students to participate in dual enrollment: early college (college credit) and career dual enrollment. Early college dual enrollment refers to academic or college credit coursework at the postsecondary level that leads to a college credit certificate or degree. Early college dual enrollment is available through community colleges and universities.

Career dual enrollment is a curricular option of elective credits toward earning the high school diploma and completing a career-preparatory certificate program and is available through district career centers and community colleges. Career dual enrollment is not intended to enable students to take isolated courses unrelated to a program. School districts must inform all students of the option and eligibility criteria. Students participating in dual enrollment are exempt from the payment of registration, tuition, and laboratory fees.

The key feature of dual enrollment is the award of both secondary and postsecondary credit, not the location of instruction. Vocational preparatory instruction, college preparatory instruction, and other pre-collegiate instruction are ineligible for dual enrollment credit because they are not receiving postsecondary credit. Physical education skills courses are also ineligible for dual enrollment.

There are arrangements whereby secondary students can take secondary-level courses at postsecondary institutions. These arrangements are sometimes referred to as “shared enrollment,” but they are not dual enrollment because the student is receiving secondary credit only. ² Table 1 reveals that 7,954 high school students participated in shared enrollment in 2005-06 by taking secondary career and technical courses at district career centers. ³

¹Section 1007.271, F.S.

²Another term, “co-enrollment,” refers to secondary students taking adult education courses for high school graduation credit.

³To identify shared enrollment, we selected students who took secondary career and technical education courses for which the school of instruction was different than the school of enrollment. Among this group, only students with schools of instruction that were career centers were selected.

Table 1
7,954 students in 20 districts participated in shared enrollment in 2005-06

CAREER DUAL ENROLLMENT DATA

The charts and tables that follow describe the characteristics of high school students dually enrolled in district career certificate programs. In 2006-07 there were 4,136 dually enrolled students in district career certificate programs compared to 1,226 community college career certificate dual enrollment students. District career dual enrollment has increased slightly from 3,971 students in 2003-04 to 4,136 students in 2006-07. Fifty-seven percent of district career dual enrollment students in 2006-07 were male and a majority (51%) were minorities. In 2006-07, Hillsborough, Orange, and Charlotte counties were leaders in career dual enrollment headcount, and Orange, Osceola, and Manatee counties led in career dual enrollment FTE. The top three district career dual enrollment programs across all four years of the analysis were Automotive Services Technology, Web Design Services, and Patient Care Technician.
