June 2011
Executive Summary

In the year 2000, the Florida Legislature required the Florida Department of Education (Department) to develop and implement a system for evaluating the quality of district professional learning systems. Pursuant to those requirements stipulated in Section 1012.98 – School Community Professional Development Act (F.S.) and legislative proviso language, the Department generated the Professional Development System Evaluation Protocol. In the 2009-10 school year, the Department revised and updated the system, generating the Third Cycle of the Professional Development System Evaluation Protocol. This report documents the First Year of implementation of the Third Cycle.

The purposes of the Professional Development System Evaluation Protocol are to:

1. Ensure the highest quality district, school, and faculty Professional Development Systems in Florida to support instructional programs throughout the state and increase student achievement.
3. Provide Florida school districts with the methods and protocols needed to conduct ongoing assessments of the quality of professional development in their schools.

The Third Cycle of the Professional Development System Evaluation Protocol is based on a set of 65 standards that describe the characteristics and components of a quality professional development system that meets the requirements of Florida’s laws. These standards were generated from the statements in Florida’s laws as well as the professional development standards generated by the National Staff Development Council (NSDC) entitled Standards for Staff Development (Revised, 2001). The standards reflect three levels of the Professional Development System and four strands incorporated into each level as follows:

<table>
<thead>
<tr>
<th>Levels</th>
<th>Strands</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.0 Educator Level</td>
<td>Planning</td>
</tr>
<tr>
<td>2.0 School Level</td>
<td>Learning</td>
</tr>
<tr>
<td>3.0 District Level</td>
<td>Implementing</td>
</tr>
<tr>
<td></td>
<td>Evaluating</td>
</tr>
</tbody>
</table>
The system uses a 4-point rating scale ranging from unacceptable (1) to excellent (4). The midpoint on this scale is 2.5.

Nineteen districts were reviewed in the 2010-11 school year (First Year of the Third Cycle) representing 28% of the 67 districts in Florida:

- Bay
- DeSoto
- Flagler
- Franklin
- Gadsden
- Gilchrist
- Glades
- Jackson
- Jefferson
- Lake
- Leon
- Orange
- Palm Beach
- Pinellas
- Polk
- St Lucie
- Sumter
- Taylor
- Walton

Figure 1 presents the results in mean ratings by each strand and level.
Overall conclusions from the analyses conducted to date, including the First and Second Cycles as reported previously for the system, were:

1. **Districts that receive good or excellent ratings on the district professional development standards also demonstrate greater increases in student achievement.** A correlational analysis was conducted for the Second Cycle to examine the relationship between high ratings on the standards and the last district standard, 3.4.7 Student Gains. The analysis demonstrated a moderate positive relationship (.33) between the state’s ratings of districts on student achievement increases and ratings on the quality of professional development in the district, significant at the .01 level. These results support the effectiveness of high quality professional development programs in contributing to increased student achievement in school districts.

2. The positive relationship between high district level performance on the professional development standards and high levels of student achievement is increasing over time and application of the standards by districts. The correlational analysis improved from .31 for the First Cycle to .33 for the Second Cycle. Analyses of the Third Cycle will be completed at the end of the cycle when sufficient numbers of reviews have been conducted to allow an appropriate analysis.

3. **The First Year-Third Cycle Protocol collaborative effort of the Department of Education and district, consortia, and university staff was successfully completed.** The process results in greater understanding of and adherence to the standards by all participants. Over 110 volunteers served on the teams, representing 477 days of contributed time to the overall system.

4. **Most school districts are currently implementing many standards related to Planning and Learning at the “good” or “excellent” level.** Averages for most strands and levels for the First Year-Third Cycle were above 3.0, a rating of “good.”

5. **Many districts have incorporated the standards into their organization/structure.** Districts are using the Protocol standards and the rationales for the standards in their planning and operations. Some districts have used the standards to generate checklists for professional learning developers and to provide quality control over all planned professional learning.

6. **The system provided a common language.** Conceptually, many discussions and planning sessions center now on the four strands of Planning, Learning, Implementing, and Evaluating. Common language is more apparent now for concepts and practices such as learning strategies and learning communities.

7. **The set of standards raised expectations.** The Department’s wide dissemination and public availability of the standards have encouraged all districts to meet the standards and improve their professional development systems.

8. **Reviewers learn from other districts.** District professional development staff who participate in reviews of other districts increase their awareness of better methods for planning and implementing professional development, as well as becoming more focused on the need to improve professional learning systems in their own districts.
9. Some districts conduct self-studies. Some districts have used the Department’s self-study methods to review their professional learning systems and encourage principals and facilitators to adhere to the standards.

10. Districts need continued improvement and assistance in evaluating the impact of professional learning. The average rating for the Evaluation Strand was the lowest for the four strands.

11. Districts continue to need to make improvements in the area of Web-based Resources and Assistance. These standards were among the lowest rated standards in the First Year-Third Cycle.

12. Many districts have just initiated activities to implement the state-approved plans from 2008 for a School Principal Preparation and Certification Program. Some districts have faithfully implemented their plans, although other districts have few or no participants in the planned programs.

Overall, these results demonstrate that districts are continuing to benefit from the review system through adherence to the new 65 standards in the Third Cycle of Florida’s Professional Development System Evaluation Protocol Standards. District staff continue to improve their systems and methods of planning, learning, implementing, and evaluating professional learning. The statewide community of professional learning facilitators and directors has united around the commitment to quality professional learning systems that encourages all educators to maximize their effectiveness in teaching students.
