

Identification of Critical Teacher Shortage Areas

Recommended Critical Teacher Shortage Areas

This report identifies which certification areas represent the greatest need among teachers statewide. Using the information provided below, the recommended critical teacher shortage areas for the 2019-20 school year are as follows:

- Science-General
- English
- Mathematics
- English for Speakers of Other Languages (ESOL)
- Science-Physical
- Reading
- Technical Education
- Exceptional Student Education (ESE)

The shortage areas above represent certification areas where substantial proportions of teachers who are not certified in the appropriate field are being hired to teach such courses, where significant vacancies exist and where postsecondary institutions do not produce enough graduates to meet the needs of Florida's K-12 student population. This information can be used to determine the current and projected needs of classroom teachers for specific subject areas in the upcoming school year. The process used to determine these critical teacher shortage areas is presented below.

Background

Section 1012.07, F.S., requires the State Board of Education (SBE) to annually identify critical teacher shortage areas based on the recommendations of the Commissioner of Education. This statute is accompanied by SBE Rule 6A-20.0131, Florida Administrative Code, which specifies that the list of shortage areas identify high-need content areas and high-priority location areas using the following information:

1. The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;
2. The annual supply of graduates of state-approved Florida teacher education programs for each discipline;
3. The number and percentage of vacant positions in each teaching discipline; and
4. Critical teacher shortage areas which may be identified pursuant to rules adopted by district school boards. These areas shall be identified based on consideration of at least the information specified in items 1 through 3 above and submitted to the Department no later than June 1st of each year.

Additionally, sections 1012.22(1)(c)4.b., F.S., and 1012.22(1)(c)5.c.I., F.S., include provisions requiring local school districts to incorporate critical teacher shortage areas into both their grandfathered and performance salary schedules.

Determining Shortage Areas

The critical teacher shortage areas for 2019-20 were determined using information provided in Exhibits 3 through 5. The Department used the information in each of the exhibits to create rankings for each measure in Exhibit 1.¹ Rankings were then averaged across all measures to produce the final rankings.

In Exhibit 1 below, the shaded and bolded subject fields indicate the recommended 2019-20 Critical Teacher Shortage areas. The final column in Exhibit 1, “Final Rank,” shows that Science-General was ranked first place with an average rank of 8.33. English was ranked second and followed by Mathematics, English for Speakers of Other Languages (ESOL), Science-Physical, Reading, and Technical Education as critical teacher shortage areas.

Exhibit 1 – Summary of Critical Teacher Shortage Rankings for 2019-20

¹ The rankings order the data with 1 being the subject area that shows the most need for additional teachers. For example, when looking at Exhibit 5, the subject area with the fewest program completers would be ranked as number 1, but for Exhibit 4 the subject area with the most vacancies would be ranked as number 1. In the case of a tie, all subject areas are assigned the lowest rank. For example, if three subject areas tie for third place (i.e. there is no way to distinguish between third, fourth, and fifth place), they would all be assigned fifth place.

Information on Critical Teacher Shortage Areas

Data on teachers currently in the workforce and their areas of certification are presented below to provide context for the recommended critical teacher shortage areas. This information covers the following: certification areas in which the majority of teachers are currently certified; the number of courses taught by teachers who were not appropriately certified for the courses they were teaching; the projected number of teacher vacancies as reported by school districts; and the number of recent completers of state-approved teacher preparation programs in Florida. Additional information is provided on the number of courses being taught by teachers who were not certified in the appropriate field for the courses they were teaching in high-priority locations.² The following exhibits provide information on teacher supply and demand:

- Exhibit 2 – Number of Teacher Certifications Held by Certification Area During 2018-19
- Exhibit 3 – Number of Courses Taught by Teachers Not Certified in the Appropriate Field, by Certification Area During 2017-18
- Exhibit 4 – Number of Current and Projected Vacancies by Certification Area for 2018-19
- Exhibit 5 – Number of Students Completing Teacher Education Programs During 2016-17
- Exhibit 6 – High-Priority School Locations and Courses Taught by Appropriately Certified Teachers in 2017-18

It is important to note and emphasize that all data are as reported by school districts or teacher preparation programs.

² Section 1012.07, F.S., defines high-priority locations as high-density, low-economic urban schools; low-density, low-economic urban schools; low-density, low-economic rural schools; and schools that earned a grade of “F” or three consecutive grades of “D” pursuant to s. 1008.34, F.S.

Exhibit 2 provides the total number of certifications held by teachers in 2018-19 by certification area. If a teacher held a certification in multiple subject areas, the certification is counted once for each subject area. The most common teacher certification area for the 2018-19 school year was Elementary Education, making up 22.35% of all certifications. This was closely followed by ESOL at 20.92%. Shortage areas for 2019-20 are shaded and bolded in the exhibit below. Following Elementary Education and ESOL, the numbers drop off with ESE making up 10.88% of certifications and Reading and Pre-K/Primary Education making up 6.88% and 4.92% of certifications, respectively. The eight recommended critical teacher shortage areas account for about 50.01% of all certifications (n=208,143). The complete crosswalk of “Certification Subject Codes to Certification Areas” can be found in Appendix C.

Districts prefer to hire teachers certified in the appropriate field(s) for the courses they teach when possible to ensure students are taught the Florida Standards at the level of rigor required. Exhibit 3 provides the total number and percentage of courses taught in each certification area statewide, as well as the total number and percentage of courses taught in each certification area by teachers who were not certified in the appropriate field, as reported by school districts for fall of the 2017-18 school year. The difference between the percentage of total courses that require a certification in the particular certification area and the percentage of courses being taught by teachers not certified in the appropriate certification area is computed. When this number is negative, it indicates the certification area is over-represented among courses taught by teachers not certified in the appropriate field when compared to the proportion of courses requiring the certification area represented overall. This information provides detail on the certification areas that are currently in demand across all school districts based on how frequently courses are being taught by teachers without the required certification relative to those courses' prevalence among course offerings in Florida. English had the highest percentage of courses taught by teachers without the required certification relative to its prevalence among course offerings in Florida.

Most of the recommended critical teacher shortage areas for 2019-20 are among those with the highest projected vacancies and the highest number of current vacancies for 2018-19. Exhibit 4 provides the total number of current vacancies for the 2018-19 school year and the total number of projected vacancies by certification area. This information is collected from each district³ and is typically used to plan recruitment efforts, including “The Great Florida Teach-In” held annually. This highlights the anticipated subject areas of teacher demand seen across all school districts.

The number of students earning a certification in a particular content area in Florida gives an estimate of the number of new teachers available to fill vacancies in the state. Exhibit 5 presents the most recent information on new completers reported by teacher education programs across Florida. Certification areas with zero completers reported in 2016-17 represent teacher preparation program areas that either were not offered in a Florida college or university in 2016-17 or where there were no program completers that year.

Consistent with Florida Statutes, high-priority locations are identified as high-density, low-economic urban schools, low-density, low-economic rural schools, and schools that earned a school grade of “F” or three consecutive grades of “D” or below. Low-economic schools are those that have 75% or more students who qualify for free or reduced-price lunch. Urban and rural school distinctions are based on the National Center for Education Statistics (NCES) locale codes which are a measure of geographic status on an urban continuum that ranges from “large city” to “rural” based on the standards used by the Census. The complete list of high-priority school locations can be found in Appendix A and Appendix B.

Exhibit 6 provides information on the number of high-priority school locations and the proportion of courses at those locations being taught by teachers who were not certified in the appropriate field for the courses they teach (out-of-field) and teachers who were certified in the appropriate field for the courses they teach (in-field). The statewide percentage of courses taught by out-of-field teachers for all schools that received a school grade in 2017-18 is 6.00%. Schools that received a combination of “D” ratings in the past three years had the largest percentage of courses being taught out-of-field at 10.01%. Schools that had received a school grade of “F” had 4.74% of courses being taught out-of-field, while 7.34% of courses at urban/low-economic schools and 3.71% of courses at rural/low-economic schools are being taught out-of-field.

¹The list of high-priority school locations can be found in Appendix A and Appendix B attached.

²Per section 1012.07, F.S., in order to be a high-priority location area, a school must have earned three consecutive “D” ratings. For the purposes of this analysis, we have also included schools that earned a “D” for the current year and either a “D” or an “F” for both of the prior two years, considering this situation to be functionally equivalent with the intent of the statute.
