

202019-20210 Dual Enrollment Course-High School Subject Area Equivalency List

This list should not be interpreted as a complete list of the dual enrollment courses available.

Current law allows for any course in the Statewide Course Numbering System (SCNS), with the exception of remedial courses and Physical Education skills courses, to be offered as dual enrollment. Three credit (or equivalent) postsecondary courses taken through dual enrollment that are not listed on this list shall be awarded at least 0.5 high school credits either as an elective or subject area credit as ~~designated in the local dual enrollment articulation agreement determined by the local school district.~~ Postsecondary courses that are offered for fewer than three credits may earn less than 0.5 high school credit.

~~Any upper-level (3000-4999) postsecondary course that requires a course from this list that awards 1.0 high school credit as a prerequisite shall also receive 1.0 high school credit.~~

Course titles listed are the titles as found in the SCNS, individual postsecondary institutions may utilize alternative names.

Courses indicated as Postsecondary General Education Core Subject Area courses (GE Core), may also be applied to the General Education Core requirements for an undergraduate degree from a public postsecondary institution in Florida. Students should check with their postsecondary institution regarding these requirements.

English

Courses listed in this section shall be considered English coursework for the purposes of high school graduation requirements.

Courses with AML, ENC, ENL and LIT prefixes that require ENC X101 as a prerequisite as identified in the SCNS shall award 1.0 high school English credit. Other courses within these prefixes and others may be award English credit based on district review and policy.

Physical Education: Personal Fitness

These courses only satisfy the personal fitness requirement; students must still complete another 0.5 credit physical education elective course to complete the 1.0 physical education graduation requirement.

Courses within in the PEM prefix are ineligible for dual enrollment. Courses within the PEL, PEN, PEO, and PEQ prefixes should be evaluated for eligibility. *

Practical Arts

For those career and technical secondary courses that have been identified as satisfying the fine or performing arts high school graduation requirement (s. 1003.4282(3)(e), Florida Statutes), the equivalent postsecondary CTE course will also satisfy that requirement. Each of these courses has been identified by a committee of representatives from Career and Technical Education and Fine Arts as a practical arts course that incorporates artistic content and techniques of creativity, interpretation, and imagination.

Science

High School Graduation Requirement in Science for Students Entering Grade Nine in:

2014-15 or later: 3 credits in Science, one of which must be Biology I (BI), two of which must be equally rigorous (EQ) science courses, two must have a laboratory component.

All dual enrollment science courses should satisfy the equally rigorous requirement; certain course identified on this list will satisfy the Biology I high school graduation credit. Dual enrollment science course taken **with** a corresponding laboratory will be awarded 1.0 high school science credit. Dual

enrollment science courses taken **without** a laboratory component will be awarded 0.5 high school science credits. Separate lecture and lab courses may not be combined or the grades averaged for secondary transcript purposes. The lecture and lab courses must be listed separately on the student’s secondary transcript with the grade(s) as assigned by the post-secondary institution.

Lecture and Lab courses with different course numbers may be used to fulfill a 1.0 high school credit if the lab course is appropriate to the lecture course as identified by the postsecondary institution.

Biology I: Dual enrollment courses in general biology identified on this list will meet the Biology I high school graduation requirement. However, courses that are a lecture-only format, and are not taken with a corresponding laboratory, are designated as Equally Rigorous and will be awarded 0.5 high school credit. *A district-determined (DD) subject area graduation code was implemented in SY 2018-19 and thereafter, which has been applied to specific courses. Schools MUST convert the DD code to an acceptable subject area code on official student records in order for a student to receive graduation credit. For the 2018-2019 and 2019-20 school years, the only acceptable subject area codes that can be used for those courses carrying the DD graduation code will be codes BI or EQ.

Note: Two lecture-only format courses in similar numbers to those designated as Biology may satisfy the Biology I graduation requirement, students should be advised that they will still need to complete two laboratory courses.

End of Course Assessment: Students who complete their Biology I requirement through dual enrollment are not required to take the Biology I End-of-Course Assessment (EOC). However, students who choose to pursue the “Scholar” diploma designation must complete the Biology I EOC. The EOC will be used for the designation only. The content in the sequence BSC X010 and BSC X011 or BSC X007 and BSC X008 are comparable to the standards for Biology I and therefore can be used as preparation for the Biology I EOC for those students who choose to take the assessment.

Social Studies

Courses listed in this section shall be considered the specific Social Studies coursework for the purposes of high school graduation requirements as indicated.

United States History: Faculty reviewers have determined that the content in the AMH X010 and AMH X020 sequence is comparable to the standards for United States History and may be used for preparation for the End-of-Course (EOC) assessment. All other AMH courses should be reviewed by the school district and postsecondary institution to determine if the course(s) may be used as preparation of the U.S. History EOC.

~~**Economics:** Section 100.4282(3)(d), F.S., requires one-half credit in economics. The school district and postsecondary institution may determine if the postsecondary course offered through dual enrollment meets this requirement.~~

~~202019-20210~~ Dual Enrollment Course- High School Subject Area Equivalency List

Career Dual Enrollment Credit

The inclusion of career and technical education course on this list does not guarantee that they are all appropriate for career dual enrollment. Institutions must determine which of these or any other career courses meet the statutory requirements for career dual enrollment in section 1007.27, Florida Statutes. Under these provisions, the course must lead to an industry certification approved by the Department as specified in s. 1008.44, F.S.

Career dual enrollment includes courses offered through career certificate (clock hour) programs and career associate degree programs (e.g., Associate of Science).

For college credit programs, postsecondary courses taken through dual enrollment for three credits or higher that are part of a postsecondary career/technical program of study (College Credit Certificate, Applied Technology Diploma, Associate in Applied Science, Associate of Science) shall be awarded at least 0.5 elective credits toward high school graduation.

For Career Certificate clock hour courses taken through dual enrollment, the following methodology must be used for the awarding of high school credits:

0.5 high school credit for each 75 hours in the course rounded down to the nearest 0.5 credits

In the following two sections, information on career certificate clock hour courses and career education college credit and the corresponding high school credit that may be awarded for these courses is provided. If a course is not listed, one of the following may apply: 1) The course is not at least 75 clock hours or at least 3 college credit hours and cannot result in award of high school credit, 2) the course is not eligible for dual enrollment because it does not lead to an industry certificate approved under sections 1008.44, F.S., or 3) the course is recently approved and has not been included in this table.

The high school credits are awarded upon completion of the postsecondary course. Individual courses may be awarded more or less credit than is indicated on the list based upon the number of hours of which a course is taught at a Florida College System institution. Clock hour courses offered in school district technical centers/colleges use a standard program length pursuant to Rule 6A-6.0571 FAC and there is no variance in the length of time the course is offered.

Students seeking to meet the requirements of the Gold Seal Vocational Scholarship through dual enrollment must carefully choose courses that meet the requirement for 3 sequential credits in one career education program.

Practical Arts

For those career and technical secondary courses that have been identified as satisfying the fine or performing arts high school graduation requirement (s. 1003.4282(3)(e), F.S.), the equivalent postsecondary CTE course will also satisfy that requirement. Each of these courses has been identified by a committee of representatives from Career and Technical Education and Fine Arts as a practical arts course that incorporates artistic content and techniques of creativity, interpretation, and imagination.
