District Career Dual Enrollment: 2013-14 Enrollment Report

Definition of Career Dual Enrollment

Florida Statutes define dual enrollment as one of several articulated acceleration mechanisms (early admission, advanced placement, credit by examination, International Baccalaureate, and other postsecondary early entrance opportunities) where students enroll in postsecondary instruction and receive both postsecondary and secondary credit.¹ The intent is to broaden curricular options, increase depth of study options available to students and shorten the time necessary for completing the requirements for earning a high school diploma and a postsecondary certificate or degree.

Through dual enrollment, public, private and home education secondary students may enroll in postsecondary courses creditable toward both high school graduation and a career certificate or an associate or baccalaureate degree. There are two curricular avenues for students to participate in dual enrollment: early college (college credit) and career dual enrollment. Early college dual enrollment refers to academic or college credit coursework at the postsecondary level that leads to a college credit certificate or degree. Early college dual enrollment is available through Florida colleges and universities.

Career dual enrollment is a curricular option of elective credits toward earning the high school diploma and completing a career certificate program and is available through district career centers and Florida colleges. Career dual enrollment is not intended to enable students to take isolated courses unrelated to a program. School districts must inform all students of the option and eligibility criteria. Students participating in dual enrollment are exempt from the payment of registration, tuition, laboratory fees and other fees, such as technology fees and parking decal fees, typically assessed with tuition.

The key feature of dual enrollment is the award of both secondary and postsecondary credit, not the location of instruction. Applied Academics for Adult Education, developmental courses and other pre-collegiate instruction are ineligible for dual enrollment credit because students do not receive postsecondary credit. Physical education skills courses are also ineligible for dual enrollment.

Career Dual Enrollment Data

In 2013-14, ninety-one percent (91%) of career dual enrollment took place in district career centers and nine percent (9%) took place in colleges. District career dual enrollment has increased from 5,793 students in 2012-13 to 6,020 students in 2013-14. Several districts experienced declines in their total headcount while others reported increases. For example, Orange County School District, which accounted for seventeen percent (17%) of the total headcount of dual enrollment of students for the 2012-13 school year, reported an eleven percent (11%) decline in dual enrollment headcount for the 2013-14 school year. In contrast, Suwannee County School District reported a dual enrollment headcount of 163 students for the 2013-14 school year compared with 15 students reported for the 2012-13 school year.

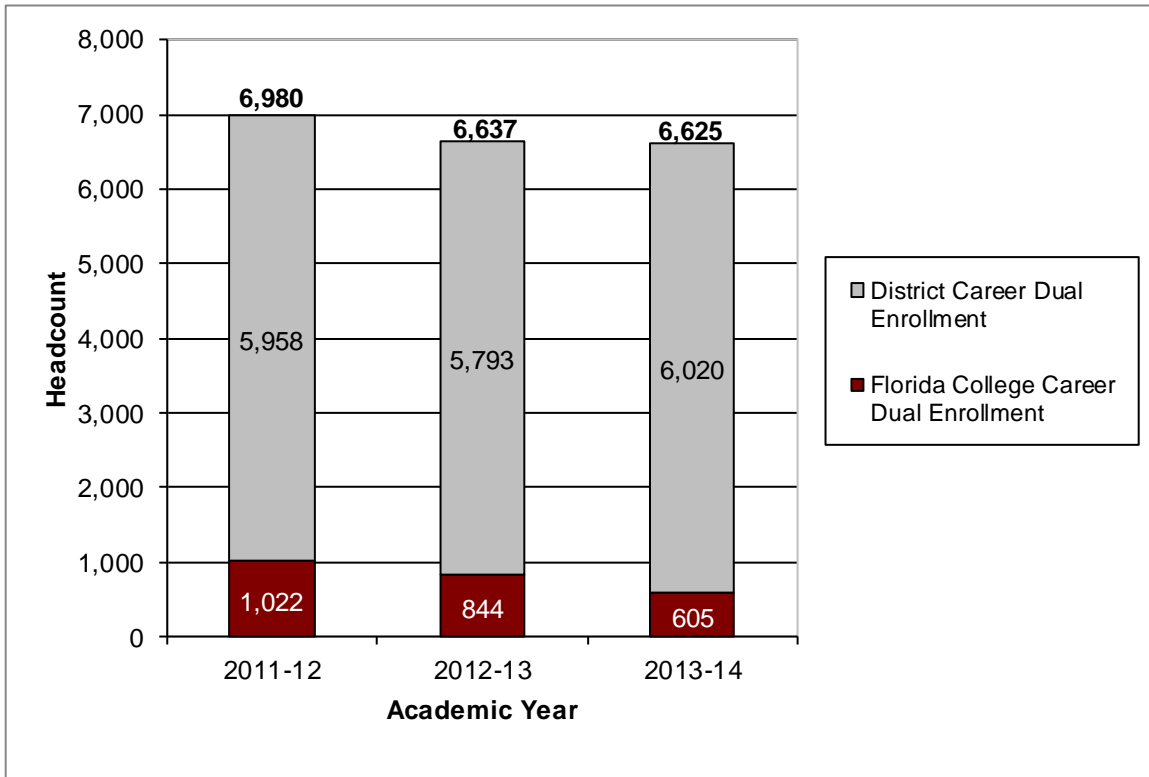

Fifty-nine percent (59%) of district career dual enrollment students in 2013-14 were male and the majority of the total population (63%) was identified as a minority. In 2013-14, Miami-Dade and Orange County School Districts reported the highest career dual enrollment headcount. Orange and Broward County School Districts reported the highest career dual enrollment FTE.

¹ Section 1007.271, F.S.

The district career dual enrollment programs with the highest headcounts were Commercial Foods and Culinary Arts, Medical Administrative Specialist, Automotive Service Technology, Aircraft Airframe Mechanics and Aircraft Powerplant Mechanics.
