EXECUTIVE SUMMARY

Rule 6A-1.0019, F.A.C., will set forth requirements relating to threat management, a process by which school districts, K-12 schools, charter school governing boards, and charter schools identify, assess, manage, and monitor potential and real threats to student safety. The proposed amendment updates the threat management manual, instrument, and training requirements, and clarifies the definitions of "school" and "district" to address college and university-sponsored charter schools. The amended rule also removes outdated language and references to the prior threat assessment model.
