2023-2024 Policies and Procedures: Hardee (Approved)

Section E: Participation in State and District Assessments

The school district administers districtwide assessments of academic student achievement. Yes
No

History

If <u>yes</u>, include the name of each districtwide assessment and whether the assessment is administered to students on alternate academic achievement standards. If the districtwide assessment is not administered to students on alternate academic achievement standards, identify the corresponding alternate assessment. (If your school district uses a portfolio as a corresponding district alternate assessment, the data collected should be based on grade-level alternate academic achievement standards. For portfolios, indicate what information is being collected, how the information is being recorded, what type of scoring rubric is being used, and how the school district ensures that all teachers are collecting the same information and scoring the data the same way.)

District-Wide Assessment corresponding to alternate assessment would be iReady, or Brigance Inventory of Early Development, and Brigance Comprehensive Inventory of Basic Skills.

History

Parental Consent Documentation

In accordance with s. 1003.5715, F.S., and Rule 6A-6.0331(10), F.A.C., the school district may not proceed with a student's instruction in access points and the administration of an alternate assessment without written and informed parental consent unless the school district documents reasonable efforts to obtain parental consent and the student's parent has failed to respond or the school district obtains approval through a due process hearing. The school district shall obtain written parental consent for the actions described above on the Parental Consent Form – Instruction in Access Points – Alternate Academic Achievement Standards (AP-AAAS) and Administration of the Statewide, Standardized Alternate Assessment, Form 313181 https://www.flrules.org/Gateway/reference.asp?No=Ref-14585.

The school district certifies that it either obtains prior parental consent or due process approval for every student participating in the FAA program. If prior parental consent is not obtained, the school district certifies that it has documentation of reasonable efforts to obtain that approval and consent, or a final order from DOAH. • Yes

O No

History

Percentage of Students on Alternate Assessment

The Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (which can be found at <u>https://www.ed.gov/essa</u>), limits the percentage of students that a state may assess with an AA-AAAS to no more than 1 percent of all assessed students in the grades assessed in a state for each subject.

10/17/24, 2:43 PM

GSW | 2023-2024 Policies and Procedures: Hardee (Approved)

While there is a limit on the percentage of students statewide who may participate in the AA-AAAS, there is no such limit among school districts; however, 34 C.F.R. § 200.6(c)(3)(ii) and (iv) require that a school district submit information justifying the need to assess more than one percent of its students in any subject with an AA-AAAS. The state must make that information publicly available, provided that such information does not reveal personally identifiable information about an individual student.

It is understood that school districts have unique circumstances that may contribute to a higher number of students who are in access courses and participating in the FAA program. The purpose of this justification is to ensure that school districts are cognizant of their current processes and procedures to ensure that an IEP team decision to place a student in access courses is in alignment with state requirements and is the most appropriate academic decision for the student.

What is your school district's 2022-23 participation percentage in the FAA in the following areas?

History

Is the school	district	over	one	percent	in	any	area?
• Yes							
O No							

History

The criteria for the following statement is outlined in s. 1008.22(3)(d), F.S., and Rule 6A-1.0943, F.A.C., and on the Checklist for Course and Assessment Participation, which can be found at <u>https://faa.fsassessments.org/-/media/project/client-portals/florida-alt/2023-2024-faa/manuals-and-guides/checklist-for-course-and-assessment-participation.pdf</u> for use in determining student eligibility for participation in the FAA program.

If the school district is over one percent in any area, please provide a description of how the school district is ensuring that IEP teams are adhering to the criteria (see above.)

The Assessment Planning Resource Guide for IEP Teams is provided to decision makers for use in determining student eligibility. Hardee District Schools utilizes the Assessment Participation Checklist that is embedded in PEER to determine if a student is eligible to participate in the FSAA program. Adhering to more than two standard deviations below the mean on an intelligence quotient (IQ) score is also a consideration when determining the need for FSSA. Thus, only students that are significantly cognitively disabled would be considered to participate in the FSAA. The district also completes a self assessment for DOE via the FSAA Assurances spreadsheet. During this self assessment, the district reviews IEP's, psychologicals, parent consents, and student schedules to ensure students with the most significant cognitive disabilities are identified. Technical Assistance training is completed as needed at school sites to review eligibility criteria for FSAA participation based on the Assessment Participation Checklist.

History

Provide a justification, with supporting evidence, that identifies specific programs or circumstances within the school district that may contribute to higher enrollment of students in access courses that exceeds one percent (e.g., center schools serving surrounding school districts).

Hardee County is a small and rural district that has a poverty level of 27% compared to the state poverty level of 13.6% (Source 2018 American Community Survey {ACS}). The low cost of living, subsidized housing, and lack of a public transportation system hinders our community. There is no community after school/summer program (such as the YMCA) for children to participate in to help develop social, academic, and healthy lifestyle skills. Over the last three years there has been a steady increase in drug activity and arrests. In 2017, 14% of arrests were drug related, 2018 showed 16% and 2019 was 17%. Also, in the last three years, fourteen students transferred to our district from neighboring districts or out of state with IEPs for access courses which has contributed greatly to the higher enrollment.

If an identified risk ratio is 3 or above in any area, describe the school district's plan to address this disproportionality. This could include examining practices, such as the training and technical assistance provided to personnel on culturally responsive practices; working within a multi-tiered system of supports (MTSS) to promote best practices in screening; progress monitoring; and initial eligibility determination. School districts may also refer to their efforts to decrease disproportionality in evaluation, identification and discipline if similar efforts are made in that area.
The only area in which the district was over 3 was in the area of Science for Asian students.
However, due to the small number of students participating this number is inflated. There was
only 1 student in that subgroup that took the assessments so therefore there is not a true
discrepancy.

Rule 6A-1.0943, F.A.C., Statewide Assessment for Students with Disabilities
District-Specific Procedures
These are the criteria required for participation in the statewide, standardized alternate assessment as per Rule 6A-1.0943(5), F.A.C.:
Section A: The decision that a student with a significant cognitive disability will participate in the statewide, standardized alternate assessment as defined in Rule 6A-1.0943(5)(a), F.A.C., must be made by the IEP team and recorded on the IEP.

If the definition of "most significant cognitive disability" is not met according to the criteria set in Rule 6A-1.0943(1)(f)1., F.A.C., then complete Section E of this document, which satisfies Rule 6A-1.0943(1)(f)2., F.A.C.

GSW | 2023-2024 Policies and Procedures: Hardee (Approved)

Section B: The provisions regarding parental consent for participation in the statewide, standardized alternate assessment found in Rule 6A-6.0331(10), F.A.C., must be followed.

Section C: In order for a student to participate in the statewide, standardized alternate assessment, all of the following criteria must be met:

1. The student must receive exceptional student education (ESE) services as identified through a current IEP and be enrolled in the appropriate and aligned courses using alternate achievement standards for two consecutive full-time equivalent reporting periods prior to the assessment;

Evidence of criteria will be provided through the student's current IEP and student schedule.

2. The student must be receiving specially designed instruction, which provides unique instruction and intervention support that is determined, designed and delivered through a team approach, ensuring access to core instruction through the adaptation of content, methodology or delivery of instruction and exhibits very limited to no progress in the general education curriculum standards;

Evidence of criteria will be provided through MTSS or response-to-intervention (RtI) documentation.

3. The student must be receiving support through systematic, explicit and interactive small-group instruction focused on foundational skills in addition to instruction in the general education curriculum standards;

Evidence of criteria will be provided through MTSS or Rtl documentation.

4. Even after documented evidence of exhausting all appropriate and allowable instructional accommodations, the student requires modifications to the general education curriculum standards;

Evidence of criteria will be provided with ______ (the required IEP and school district documentation of services provided—accommodation logs, accommodation logs compared to classroom performance).

5. Even after documented evidence of accessing a variety of supplementary instructional materials, the student requires modifications to the general education curriculum standards;

Evidence of criteria will be provided with ______ (the required IEP and school district documentation of the provision of supplementary instructional materials—may be a summary from teacher, speech-language pathologist (SLP) or other service providers).

6. Even with documented evidence of the provision and use of assistive technology, the student requires modifications to the general education curriculum standards;

Evidence of criteria will be provided with ______ (the required IEP and school district documentation of the provision assistive technology services provided).

7. Even with direct instruction in all core academic areas (i.e., ELA, mathematics, social studies and science), the student is exhibiting limited or no progress on the general education curriculum standards, and requires modifications;

Evidence of criteria will be provided with ______ (the required IEP and school district documentation of the provision of supplementary instructional materials—may be a summary from teacher, SLP or other service providers).

8. Unless the student is a transfer student, the student must have been available and present for grade-level general education curriculum standards instruction for at least 70 percent of the school year prior to the assessment;

Evidence of criteria will be provided through the student's attendance report.

9. Unless the student is a transfer student, the student must have been instructed by a certified teacher for at least 80 percent of the school year prior to the assessment; and

Evidence of criteria will be provided through the teacher's certificate and teacher's attendance record.

10. The assessment instrument used to measure the student's global level of cognitive functioning was selected to limit the adverse impact of already-identified limitations and impairments (e.g., language acquisition, mode of communication, culture, hearing, vision, orthopedic functioning, hypersensitivities and distractibility).

Evidence of criteria will be provided through available evaluations, medical reports or screeners provided in the past.

11. The student has a most significant cognitive disability.

Section D: A student is not eligible to participate in the statewide, standardized alternate assessment if any of the following apply:

1. The student is identified as a student with a specific learning disability or as gifted;

Evidence of criteria will be provided through IEP and applicable evaluation results.

 The student is identified only as a student eligible for services as a student who is deaf or hard of hearing or has a visual impairment, a dual sensory impairment, an emotional or behavioral disability, a language impairment, a speech impairment, or an orthopedic impairment; or

Evidence of criteria will be provided through IEP and applicable data.

3. The student scored a level 2 or above on a previous statewide, general education curriculum standardized assessment administered pursuant to Section 1008.22(3)(e), F.S., unless there is medical documentation that the student experienced a traumatic brain injury or other health-related complications subsequent to the administration of that assessment that led to the student having the most significantly below-average global cognitive impairment.

Evidence of criteria will be provided through statewide standard assessment results, if applicable.

Section E: In the extraordinary circumstance when a global, full-scale intelligent quotient score is unattainable, a school district will comply as follows:

More specifically, in the event when a student cannot be directly assessed, the student who has a suspected most significant cognitive disability for whom assessment via the FAA may be appropriate as defined in Rule 6A-1.0943(1)(f)1., F.A.C., will be identified through the following detailed procedure:

List the factors the school district will use to determine that a direct assessment of cognitive functioning is not achievable.

All applicable parties (e.g. parent, school psychologist, school counselor, staffing specialist, teacher, service provider) will meet as either an IEP team (for students with ESE services) or School ProblemSolving Team to review and discuss the student and his/her needs. The school psychologist will attempt an intellectual quotient (IQ) test. If a student is unable to respond to requests/lacks receptive skills or has severe behavior dysregulation that prohibits a response and an IQ score is unattainable the school psychologist will follow the district specific assessment process.

History

Describe the assessment process the school district will use to determine if a student has a most significant cognitive disability in the absence of reliable direct assessment of cognitive functioning.

The assessment process will include a developmental assessment, input from a variety of sources familiar with the student (e.g. parent, teacher, service provider), review of all records on file, observation, and work samples. The school psychologist will synthesize all of the information in a written report to share with the IEP team.

History

Describe how the school district will train and monitor staff with compliance of the determination and assessment process.

Annual training (or more frequent, if necessary, due to change in staff) will occur for staffing specialists, school psychologists, school counselors, and/or resource specialists to review the district specific procedures when a global, full-scale intelligence quotient score is unattainable. The ESE Director or designee will monitor compliance through monthly review of the school psychologist(s) evaluation log looking for a code/notation related to unattainable intelligence quotient and thoroughness of written report prior to being sent to the school for eligibility consideration.
