# 2023-2024 Policies and Procedures: Okaloosa (Approved)

## Section E: Participation in State and District Assessments

The school district administers districtwide assessments of academic student achievement.  • Yes  • No
History
If <u>yes</u> , include the name of each districtwide assessment and whether the assessment is administered to students on alternate academic achievement standards. If the districtwide assessment is not administered to students on alternate academic achievement standards, identify the corresponding alternate assessment. (If your school district uses a portfolio as a corresponding district alternate assessment, the data collected should be based on grade-level alternate academic achievement standards. For portfolios, indicate what information is being collected, how the information is being recorded, what type of scoring rubric is being used, and how the school district ensures that all teachers are collecting the same information and scoring the data the same way.)
<b>Elementary</b> : OCSD administers the iReady diagnostic assessment to students in grades K-5. Common assessments are used in ELA, Math, and Science. For students on access points who do not take the iReady assessment, they are assessed using the Unique Learning Systems (ULS) benchmark assessments. It is at the teacher's discretion if iReady assessments are given to students on access points.
<b>Middle School</b> : OCSD administers the Read 180 assessment to students in Intensive Reading courses, grades 6-8. For students on access points who do not take the Read 180 assessment, they are assessed using the Unique Learning Systems (ULS) benchmark assessments. Common assessments are used in some courses. For courses requiring an end-of-course assessment (EOC), students working on access points are provided an alternative end-of-course assessment.
<b>High Schoo</b> l: OCSD administers the Lexia assessment to students in Intensive Reading courses, grades 9-12. For courses requiring an end-of-course assessment (EOC), students working on access points are provided an alternative end-of-course assessment.
History
Parental Consent Documentation

In accordance with s. 1003.5715, F.S., and Rule 6A-6.0331(10), F.A.C., the school district may not proceed with a student's instruction in access points and the administration of an alternate assessment without written and informed parental consent unless the school district documents reasonable efforts to obtain parental consent and the student's parent has failed to respond or the school district obtains approval through a due process hearing. The school district shall obtain written parental consent for the actions described above on the Parental Consent Form – Instruction in Access Points – Alternate Academic Achievement Standards (AP-AAAS) and Administration of the Statewide, Standardized Alternate Assessment, Form 313181 <a href="https://www.flrules.org/Gateway/reference.asp?No=Ref-14585">https://www.flrules.org/Gateway/reference.asp?No=Ref-14585</a>.

The school district certifies that it either obtains prior parental consent or due process approval for every student participating in the FAA program. If prior parental consent is not obtained, the school district certifies that it has documentation of reasonable efforts to obtain that approval and consent, or a final order from DOAH.

History

### Percentage of Students on Alternate Assessment

The Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (which can be found at https://www.ed.gov/essa), limits the percentage of students that a state may assess with an AA-AAAS to no more than 1 percent of all assessed students in the grades assessed in a state for each subject.

While there is a limit on the percentage of students statewide who may participate in the AA-AAAS, there is no such limit among school districts; however, 34 C.F.R. § 200.6(c)(3)(ii) and (iv) require that a school district submit information justifying the need to assess more than one percent of its students in any subject with an AA-AAAS. The state must make that information publicly available, provided that such information does not reveal personally identifiable information about an individual student.

access courses and participating in the FAA program. The purpose of this justification is to ensure that school districts are cognizant of their current processes and procedures to ensure that an IEP team decision to place a student in access courses is in alignment with state requirements and is the most appropriate academic decision for the student.		
What is your school district's 2022-23 participation percentage in the FAA in the following areas?

Is the school district over one percent in any area?		
● Yes ○ No		
History		

The criteria for the following statement is outlined in s. 1008.22(3)(d), F.S., and Rule 6A-1.0943, F.A.C., and on the Checklist for Course and Assessment Participation, which can be found at <a href="https://faa.fsassessments.org/-/media/project/client-portals/florida-alt/2023-2024-faa/manuals-and-guides/checklist-for-course-and-assessment-participation.pdf">https://faa.fsassessments.org/-/media/project/client-portals/florida-alt/2023-2024-faa/manuals-and-guides/checklist-for-course-and-assessment-participation.pdf</a> for use in determining student eligibility for participation in the FAA program.

If the school district is over one percent in any area, please provide a description of how the school district is ensuring that IEP teams are adhering to the criteria (see above.)

A district review team reviews requests for students to be placed on access points and assessed by FAA. The team consists of, at a minimum, a school psychologist, a district staffing specialist and a district ESE administrator. Formal assessment data and school assessment data is reviewed to ensure that all eligibility criteria has been met to determine eligibility for an intellectual disability and for working on access points. Retraining on our district ESE Policy and Procedures will occur during the 2024-2025 school year.

Provide a justification, with supporting evidence, that identifies specific programs or circumstances within the school district that may contribute to higher enrollment of students in access courses that exceeds one percent (e.g., center schools serving surrounding school districts).

Okaloosa County has two center schools. OCSD has a contract with Walton County Schools to serve their students with the most significant needs at both of the center schools located in Okaloosa. Okaloosa County is also home to three military bases where many families request assignment to so their children with significant cognitive disabilities will be able to participate in our ESE programs. Information shared in the

In the 2022-2023 Okaloosa County Community Health Assessment: 23% of Okaloosa men and 15% of Okaloosa women say they engage in binge drinking. Adults ages 18 to 44-years old are more likely to binge drink than those 45-years-old and up. In Okaloosa County, 538 doses of Narcan were administered in 2022. Florida ranks 35th out of 50 states in overall child wellbeing. Okaloosa ranks 21st out of 67 counties in overall child well-being. Nearly half of all elementary students in Okaloosa County come from families who do not make enough money to pay for their school lunches. Okaloosa children aged 5 to 11-years-old are 80% more likely to experience abuse than other children of the same age in Florida. 3 The rate of Okaloosa children aged 5 to 11-years-old who have experienced sexual violence is nearly two times higher than other children of the same age in Florida. From 2020 to 2022, 923 Okaloosa children were in foster care. Okaloosa County has significantly more youth in foster care compared to the Florida average. In 2021, 540 youth ages 10 to 17-year sold were arrested. Okaloosa's youth arrest rate is nearly three times higher than Florida's overall rate. Nearly half of these arrests were from alcohol offenses and assault/battery. 22% of Okaloosa high school students report having experienced four or more Adverse Childhood Experiences (ACEs). ACEs are linked to chronic health problems, mental illness, and substance use in adulthood

If an identified risk ratio is 3 or above in any area, describe the school district's plan to address this disproportionality. This could include examining practices, such as the training and technical assistance provided to personnel on culturally responsive practices; working within a multi-tiered system of supports (MTSS) to promote best practices in screening; progress monitoring; and initial eligibility determination. School districts may also refer to their efforts to decrease disproportionality in evaluation, identification and discipline if similar efforts are made in that area.

A disproportionality for combined ELA Asian or Pacific Islander has been identified in ELA (4.31), Math (4.51), and Science (6.68). This is partially due to the low number of students included in this reporting category. The Okaloosa School District will provide specific training to assist with not overidentifying those individuals with disabilities.

History

Rule 6A-1.0943, F.A.C., Statewide Assessment for Students with Disabilities

**District-Specific Procedures** 

These are the criteria required for participation in the statewide, standardized alternate assessment as per Rule 6A-1.0943(5), F.A.C.:

**Section A**: The decision that a student with a significant cognitive disability will participate in the statewide, standardized alternate assessment as defined in Rule 6A-1.0943(5)(a), F.A.C., must be made by the IEP team and recorded on the IEP.

If the definition of "most significant cognitive disability" is not met according to the criteria set in Rule 6A-1.0943(1)(f)1., F.A.C., then complete Section E of this document, which satisfies Rule 6A-1.0943(1)(f)2., F.A.C.

**Section B**: The provisions regarding parental consent for participation in the statewide, standardized alternate assessment found in Rule 6A-6.0331(10), F.A.C., must be followed.

Section C: In order for a student to participate in the statewide, standardized alternate assessment, all of the following criteria must be met:

 The student must receive exceptional student education (ESE) services as identified through a current IEP and be enrolled in the appropriate and aligned courses using alternate achievement standards for two consecutive full-time equivalent reporting periods prior to the assessment;

Evidence of criteria will be provided through the student's current IEP and student schedule.

2. The student must be receiving specially designed instruction, which provides unique instruction and intervention support that is determined, designed and delivered through a team approach, ensuring access to core instruction through the adaptation of content, methodology or delivery of instruction and exhibits very limited to no progress in the general education curriculum standards;

Evidence of criteria will be provided through MTSS or response-to-intervention (RtI) documentation.

3. The student must be receiving support through systematic, explicit and interactive small-group instruction focused on foundational skills in addition to instruction in the general education curriculum standards;

	•	•
	Evidence of criteria will be provided through MTSS or Rtl document	tation.
4.	<ol> <li>Even after documented evidence of exhausting all appropriate and requires modifications to the general education curriculum standard</li> </ol>

	Evidence of criteria will be provided with (th	he required IEP and school district documentation of

the provision of supplementary instructional materials—may be a summary from teacher, SLP or other service providers).

8. Unless the student is a transfer student, the student must have been available and present for grade-level general

education curriculum standards instruction for at least 70 percent of the school year prior to the assessment;

Evidence of criteria will be provided through the student's attendance report.

9. Unless the student is a transfer student, the student must have been instructed by a certified teacher for at least 80 percent of the school year prior to the assessment; and

Evidence of criteria will be provided through the teacher's certificate and teacher's attendance record.

10. The assessment instrument used to measure the student's global level of cognitive functioning was selected to limit the adverse impact of already-identified limitations and impairments (e.g., language acquisition, mode of communication, culture, hearing, vision, orthopedic functioning, hypersensitivities and distractibility).

Evidence of criteria will be provided through available evaluations, medical reports or screeners provided in the past.

11. The student has a most significant cognitive disability.

**Section D**: A student is not eligible to participate in the statewide, standardized alternate assessment if any of the following apply:

1. The student is identified as a student with a specific learning disability or as gifted;

Evidence of criteria will be provided through IEP and applicable evaluation results.

2. The student is identified only as a student eligible for services as a student who is deaf or hard of hearing or has a visual impairment, a dual sensory impairment, an emotional or behavioral disability, a language impairment, a speech impairment, or an orthopedic impairment; or

Evidence of criteria will be provided through IEP and applicable data.

3. The student scored a level 2 or above on a previous statewide, general education curriculum standardized assessment administered pursuant to Section 1008.22(3)(e), F.S., unless there is medical documentation that the student experienced a traumatic brain injury or other health-related complications subsequent to the administration of that assessment that led to the student having the most significantly below-average global cognitive impairment.

Evidence of criteria will be provided through statewide standard assessment results, if applicable.

**Section E**: In the extraordinary circumstance when a global, full-scale intelligent quotient score is unattainable, a school district will comply as follows:

More specifically, in the event when a student cannot be directly assessed, the student who has a suspected most significant cognitive disability for whom assessment via the FAA may be appropriate as defined in Rule 6A-1.0943(1)(f)1., F.A.C., will be identified through the following detailed procedure:

List the factors the school district will use to determine that a direct assessment of cognitive functioning is not achievable.

Factors include students who do not have a formal mode of communication, are working with pre-academic levels of functioning, and multiple impairments that would limit their ability to engage and/or respond to standardized evaluations to attain a global measure of intellectual functioning. The direct assessment will be attempted. Completing an assessment to obtain a global, full-scale intelligent quotient will be deemed inappropriate by professional responsible for administering the assessment.

Describe the assessment process the school district will use to determine if a student has a most significant cognitive disability in the absence of reliable direct assessment of cognitive functioning.

The evaluators will use multiple measures of evaluation, depending on the needs of a student. If applicable, a norm referenced assessment of global developmental functioning will be utilized.

History

Describe how the school district will train and monitor staff with compliance of the determination and assessment process.

Evaluators and Staffing Specialists will be trained to understand the new procedures outlined in #1 and #2. While preparing for the student's upcoming IEP, Steps 1 and 2 will be completed by the Lead Psychologist.
